

Amarinth A Series pumps are designed to API610 10th edition specifications for the Petrochemical, Chemical and Oil & Gas markets.

Amarinth have standardised on Autoflex Couplings as the default selection on their range.

The pump range uses motors from 1.1 kW up to 90 kW at 2950 rpm. We have been able to standardise on three coupling sizes ECS 11 HVII, ECS 19 HVII and ECS 35 HVII having 100 mm or 140 mm DBSE. Frequently these pumps are installed in ATEX environments.
