

## Autogard Torque Limiters

**Product:** Series 400 Torque Limiter

**Application:** Cement Mortar Pump – Pipe Lining Equipment

### **Function:**

Water tends to attack the surface of pipes, whether they are cast, ductile or steel. This company produces a machine which will clean existing pipes and then they will coat the inside diameter of the pipe with a mortar lining. The cement mortar lining provides both a physical and chemical barrier.

A problem exists with the pump which feeds cement to the pipe lining machine. Damage can occur if the cement begins to harden.

### **Torque Limiters:**

Model 401 size 4 to the output of the gearbox.

### **Benefits:**

The torque limiter prevented damage to the gearbox.

In addition it also prevents the feed pipes from becoming blocked and allows unskilled laborers to use the machine.

Increased productivity due to reduced downtime.
